

Biography:

Since their very first Psytrance parties more than twenty years back in the days the Berliners Kevin Hentschel and Rafael Gomez never stopped experimenting with electronic sounds.

Alongside multiple excursions into various sub-genres, own label activities and many open-air and club events they concentrate since 2012 on the production of driving Psychedelic Trance music and the two musicians re-invented their sound – and themselves – as “Atacama”.

Sometimes mysterious, always complex and preferential driving Atacama carry off their listeners in spheres between by gone experiences and oncoming promises where myths and reality, rhythm and movement merge into a cosmic unity.

After some releases and further being a part of Digital Om Records, the guys had mindblowing experiences while playing large festivals all over the world – such as the Antaris, Fusion, Hadra, Mundo De Oz, Rainbow Serpent & Shankra, just to name a few.

Together with Iono Music they fully focus on producing new tracks and sounds.
